Officer **P08 RICK J. PISCIA**

Date **11/27/2015**

Julia came into the station and wanted to document that today, Kevin gave another excuse for why Madeline had a diaper rash on 11/26 (reference Case # 15-17236). Kevin said that Madeline got the diaper rash from running around the house. Julia believes this is just another excuse and she does not believe him. I, Sgt Piscia asked her if Madeline was fine today and she stated she "hasn't looked at her yet." She was going to go home now and check. She left the station and at 6:27pm Julia called back and said she checked Madeline and she has the smell "of that yellow gunk from 11/26, but there is no gunk present." She requested this be documented also. I told her it would be on file. She then went to the ER with Madeline (See Sgt S. DeGroot's supplement)

At approximately 2040 hours Julia called and requested that I, Sgt Piscia go to her house and see "some evidence" she has. I spoke to Julia on the phone from the police station. I asked Julia what

evidence she had. She told me she wanted to take before and after pictures of Madeline's vaginal area so she can give it to the police for proof. I told Julia not to take any pictures and medical staff would be the ones to do an examination. I then asked her what the ER doctor advised her to do. Julia complained that the ER doctor (Sabir) would not even look at Madeline because they do no not perform pediatric rape kits and "he's (Sabir) involved in the court case." Julia then said Madeline has been vomiting and cannot hold any food down. I asked if the vomiting was happening before the ER visit. She said yes and she told Sabir about it and he did nothing. He just told her to take her to a hospital that would perform the rape testing. I explained to Julia she could have had this done yesterday but she refused. She agreed and said "she doesn't want to put Madeline through this." I explained I would document this call and she could contact her family doctor in the am. I then called the ER and inquired if Julia mentioned that Madeline was vomiting. ER staff checked with Dr. Sabir and nothing was mentioned about the vomiting.
